

knowledge collaboration

DELFT NL 25-29 OCT & learning
for sustainable innovation

TU Delft, The Hague University (THU) and TNO
organize the combined *14th ERSCP* and
6th EMSU conference in Delft, the Netherlands,
on October 25-29, 2010

ERSCP-EMSU 2010
KNOWLEDGE COLLABORATION
& LEARNING
FOR SUSTAINABLE INNOVATION

Ending the light bulb, its environmental impact and adjusting its usage practice entrenched in society does not only require new innovative technologies, but also knowledge collaboration among stakeholders and actors, and learning and education for sustainable innovation. Innovations are needed that lead to sustainable consumption and production through attractive products and services that are accepted by society and adopted by end-users, both in developing and developed countries. The conference addresses issues like:

- > How to bring about sustainable consumption and system innovations & transitions to sustainability?
- > How can higher education facilitate sustainable innovation practices?
- > How can we improve exchange and collaboration between practitioners & innovators in society and knowledge suppliers?
- > What can and what should be done at the regional level for sustainable innovation?
- > What can the North learn from the South with regard to sustainable innovation?

PROPOSED THEMES

1. Sustainable Universities and Sustainable Higher Education
2. Knowledge Collaboration for Sustainable Innovation, Design, Business and CSR
3. Sustainable Consumption and Production
4. Climate, Energy and Water
5. Sustainable Cities and Regions
6. Sustainable Consumption and Production and Innovation in developing countries
